Faculty of Economics and Business Administration

The Faculty of Economics and Business Administration of the University of Szeged has always been an important educational centre. It provides more than 10 study programmes on the Bachelor, Master and Doctoral level, both in Hungarian and English language. The international community of the Faculty is growing fast, with over 80 students enrolling in 2017.

Students who decide to join our Faculty will realize that our institution is based on the principles of cooperation and support. It is possible indeed to go beyond the formal in-class interaction between teachers and students, building a professional relationship based on mutual trust and respect. What you will find is a welcoming, familiar environment, where you will be encouraged to develop your skills, pursue your passions and be an active member of the student community.

"The Faculty of Economics and Business Administration in Szeged is a place where economists of the present and the future can cross paths, where future economic developers and leaders could begin their professional training."

Dr. Péter Kovács
Dean

What do we promise you?

High Employment Opportunities

"Before coming to Szeged, I had had solid 7 years of experience as a senior analyst at a major telecommunication company in Mongolia. Throughout the studies, I advanced my presentation and negotiation skills and above all, I learned how to work efficiently in culturally diverse teams, because most of the time the diversity of the team was a first challenge to overcome. Upon returning to Mongolia, I established my own consulting and advisory business in which the knowledge and practical skills I've developed during my studies are immensely useful to this day."

Bayanjargal Altanzul, Mongolia, alumni student of the Master programme

"Since my accounting courses and ACCA trainings received during bachelor studies, I had fallen in love with the logic and formulation of financial statements. I always wanted to be able to sum up a business entity's performance and hidden skeletons in the wardrobe, just from a glance to the financial statements of it. It turned out that during my last semester of my master studies at Szeged University, I got enrolled to the American oil company – Exxon Mobil – to the position of Financial analyst, well-known for its very competitive and training work conditions that provide everything in order to develop a young graduate like me as a professional in Finance sphere – just as I dreamed of. Without theoretical knowledge, time management, group work experience in Szeged and also built confidence to my degree and knowledge, I wouldn't have been successful in the interview sessions of the company."

Nazrin Bakirova, Azerbaijan, alumni student of the Master programme

"Everyone has their own pace achieving their goals. I kept the idle for a long time earning a BA degree. Finally, I am achieving this goal at the age of 38. At the University of Szeged I gained broad knowledge about fields of business which helped me to better myself in my professional career. I learnt a variety of online and theoretical solutions that I can use in my everyday business activities."

Genco Azrak, Turkey, student of the Bachelor programme

"Since I started studying business, my goal has always been working in marketing and sales. Nowadays, this has become a reality: I am working for a software company in Szeged as a sales development representative. I could not have done it without the skills I developed during my studies. I learnt how to be a public speaker, how to use promotional online tools, how to work in a team: these are only few of the skills you can develop in this programme, which gave me the chance to be employed even before actually graduating."

Giulia Filoso, Italy, student of the Bachelor programme

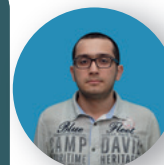

"After my experience of the bachelor programme at the faculty, I realised that I did enhance a lot, more than the knowledge of marketing and management or the self-independence of my life. Meanwhile, the professors and students here are warm, caring and encouraging. Thus, I proceeded to study in the master programme. In the master programme, I appreciate that I got a valuable opportunity to participate in the scientific competition in which I can be conscious of my weakness and learn from others to improve myself significantly."

Chen Xi, China, student of the Master programme

"I can undoubtedly divide my life into two distinct parts, as coming to Szeged is a complete milestone for me. Before coming to this university, I was also a hardworking and energetic guy in my home country, but Szeged contributed me a lot by giving a chance to demonstrate my potential more precisely in academic and social terms. Due to valuable knowledge, excellent communication skills and rich academic experience provided by our well versed professors, I am chosen as a professor's assistant and I have started to work for a start-up Marketing company."

Farid Huseynov, Azerbaijan, student of the Bachelor programme

"I have been interested in public speaking since I participated in TEDx. Since then, my goal has been to further develop presentation skills and the University of Szeged helped me a lot. A lot of courses ensure all students share their opinions and speak in front of others, thus I had a chance to improve my skills and to participate in Presentation Techniques Competition, where I won first prize."

Aralym Seiitkhanova, Kazakhstan, student of the Bachelor programme

Great Student Life

International Relations
